DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on July 10, 2003 has been entered.

Information Disclosure Statement

2. The prior art documents submitted by the applicant in the Information Disclosure Statement filed on July 10, 2003 have all been considered and made of record (note the attached copy of form PTO-1449).

Allowable Subject Matter

3. Claims 1-30 are allowed.

4. The following is an examiner's statement of reasons for allowance: Visagathilagar et al. discloses a resonantly enhanced MZ modulator comprising a phase modulator. The phase modulator comprises an input port, an output port, a first optical combiner coupled to the input port and a second optical combiner coupled to the output port (see Figure 1a). Visagathilagar et al. additionally discloses a Fabry-Perot type resonant cavity. The Fabry-Perot type cavity is achieved by applying an equal inductive load mismatch at the input and output port of the electrodes, thus providing a Fabry-Perot type cavity for the RF signal (See Figure 1b). Thus the Fabry-Perot type cavity of Visagathilagar et al. does not constitute an optical cavity. More specifically, Visagathilagar et al. does not disclose or reasonably suggest, either alone or in

combination with the prior art of record, an optical cavity having an input and an output port; and a phase modulator comprising a first optical combiner and a second optical combiner coupled to the input and output port, respectively, and disposed within the optical cavity. Visagathilagar et al. also does not disclose or reasonably suggest the associated method.

5. EP 0 140 578 A1 discloses a light modulator comprising an optical cavity. The reference does not disclose or reasonably suggest either alone or in combination with the prior art of record, an optical cavity having an input and an output port; and a phase modulator comprising a first optical combiner and a second optical combiner coupled to the input and output port, respectively, and disposed within the optical cavity. The reference also does not disclose or reasonably suggest the associated method.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

6. Any inquiry concerning the merits of this communication should be directed to Examiner Sarah Song at telephone number 703-306-5799. Any inquiry of a general or clerical nature, or relating to the status of this application or proceeding should be directed to the receptionist at telephone number 703-308-0956 or to the technical support staff supervisor at telephone number 703-308-3072.
